Canadian couples say "I Do."

the butterfly effect

Lisa Harper and Ali Poshni,
July 7, 2007

Known as social butterflies in their inner circle, Lisa Harper and Ali Poshni stayed true to their outgoing personalities and invited more than 100 of their closest friends and family to their beautiful butterfly-themed wedding day. Guests were treated to a vibrant and exciting atmosphere as they found themselves literally surrounded by the friendly creatures. "We released butterflies after the ceremony, had a delicious butterfly cake, and used images of different types of butterflies instead of numbers for our table cards," Lisa recounts. "The day itself was so much fun for Ali and me—we genuinely felt that 'wow!' feeling."

WHAT MADE THEIR DAY: "Our families flew in from both Australia and Ireland to be with us. It was so special because it was probably the only time all of our loved ones would be in one place at the same time," Ali recalls.

FAVOURITE DETAIL: "We took the introduction of the show *Friends* and made our own video version with our wedding party, then played it at the reception. We had a blast making it, and everyone loved it!" Lisa explains.
